
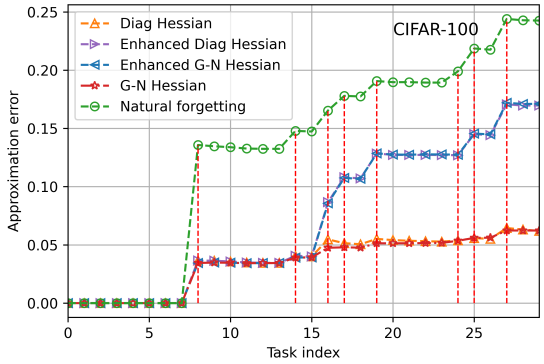

Figure 1: Evolution of approximation error $\|w_t^{-\mathbf{S}_{1:t}} - w_t^{-S_{\leq t}}\|$ across task index t in CLU process on CIFAR-100 dataset, under the following unlearning sequence: $9, \{3,4,6,8\}; 15, \{11\}; 17, \{12\}; 18, \{13\}; 20, \{14\}; 25, \{23\}; 26, \{20,25\}; 28, \{24,10\}$.

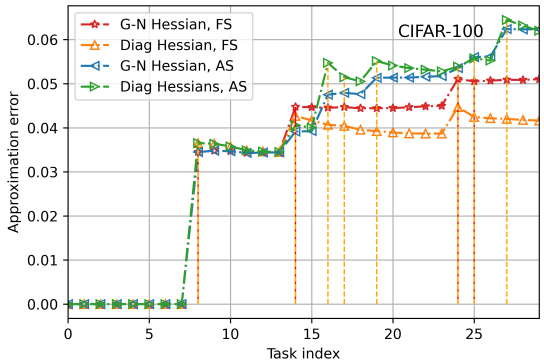

Figure 2: Evolution of approximation error $\|w_t^{-\mathbf{S}_{1:t}} - w_t^{-S_{\leq t}}\|$ across task index t in CLU process on CIFAR-100 dataset, under two unlearning sequence of forward-synchronous unlearning sequence and asynchronous unlearning sequence.

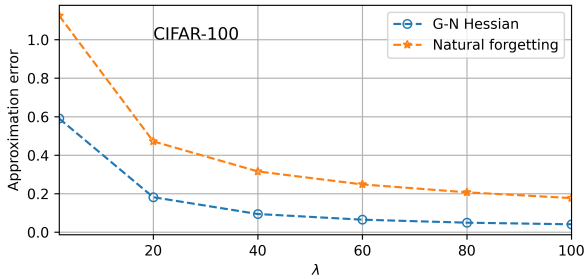

Figure 3: Final approximation error $\|w_T^{-\mathbf{S}_{1:T}} - w_T^{-S_{\leq T}}\|$ versus the regularization parameter λ.

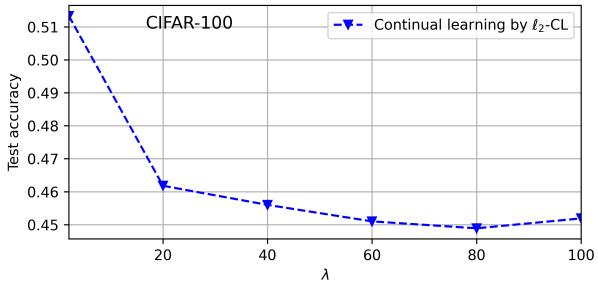

Figure 4: Final test accuracy versus the regularization parameter λ, after training by CL algorithm ℓ_2-CL without unlearning.
